Naveen Kumar P

Electronics and Communication Engineering Student

naveenkumar25102006@gmail.com | Chennai, India | linkedin.com/in/naveen2510 | github.com/Naveen-192412326

SUMMARY

Electronics and Communication Engineering student (B.E., expected 2028) with hands-on exposure to automotive assembly through a short-term industrial traineeship and an ESP32-based IoT project. Seeking internship, graduate trainee, or entry-level roles in Embedded Systems, IoT, Electronics, Automotive Electronics, and VLSI, with working knowledge of C, Embedded C, and Verilog.

EDUCATION

B.E., Electronics and Communication Engineering Expected 2028

SIMATS Engineering

PROJECTS

Design and Development of a Smart Energy Audit System Using Microwave Occupancy Detection

Status: Tested | ESP32, RCWL-0516, ACS712, ZMPT101B, Relay, LED Test Load

- Designed an ESP32-based prototype for occupancy detection and electrical parameter monitoring.
- Integrated an RCWL-0516 microwave sensor to detect occupancy, and ACS712 current and ZMPT101B voltage sensors to monitor electrical parameters.
- Tested the prototype using a relay and an LED test load.

SKILLS

Languages: C, Embedded C, Verilog

Tools: ESP32, Arduino IDE, MATLAB, Proteus, Git, GitHub

Focus Areas: Embedded Systems, IoT, Electronics, VLSI, Automotive Electronics

EXPERIENCE

Short-Term Trainee March 2026 – May 2026

HL Mando – Power Pack Assembly Line

- Assisted with assembly-line activities on the Power Pack Assembly production line.
- Participated in servo motor assembly for automotive steering assemblies.

CERTIFICATIONS

- Embedded Systems and IoT – HCLTech (In Progress)
